

Avtrach Evaluation

	5 Strongly Agree	4 Agree	3 Neutral	2 Disagree	1 Strongly Disagree
1. Avtrach was a valuable learning tool for the lab skills demo.	13	3			
2. As the nurse, I was challenged in my critical thinking and clinical decision making during the simulated skills demo.	13	3			
3. As the nurse, the knowledge gained through the simulation experience can be transferred to a real clinical setting.	13	3			
4. As the patient, I gained perspective and empathy for my future tracheostomy patients.	14	1	1		
5. As the patient, the knowledge gained through the simulation experience can be transferred to a real clinical setting.	14	1	1		
6. I was nervous during the simulated lab skill.	4	5	4	3	
7. Because of the simulated lab demo experience, I will be less nervous in the clinical setting.	9	5	2		

COMMENTS:

- It made it more realistic.
- It's bomb.com. Sim is more effective.
- I do believe this type of sim is more effective because it allows us to be a part of the patient rather than just performing the skill on a mannikin.
- I really got the feel for how the patient feels when someone is so close to your face. It made me nervous and harder to breathe. I agree this type of sim is more effective.
- I think this type of Sim helps more being able to use the equipment with actual suction and "pretend" sputum. It helps students gain more real-life experience.
- This sim made it more realistic and helped me understand a little bit more of the patient's point of view.
- It allowed it to feel more like possibly the real thing.
- Really liked using this!
- It is effective because it feels more like taking care of a real patient.
- This was more effective because putting the humanity back in the skill, adds an element mannikins cannot.
