

Avcath

Interchangeable Male/Female Genitalia

Designed by INACSL's 2016 Hayden-Vanguard Awardee

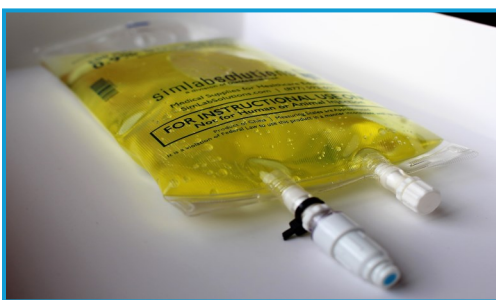

Avcath™ is designed for Healthcare Educators to address the skills mastery and critical thinking needs of learners in genito-urinary assessment and care. Its patent pending design sets-up quickly and easily so educators can focus on what is really important, reducing CAUTI and making sure the learning translates seamlessly to bedside care.

- Indwelling or Straight Catheters
- Realistic urine stream
- External labia designed to require correct hand placement for catheterization
- Non-obvious female urethra; flaccid penis
- Haptic response for real time "patient" responses
- Use as a skills trainer or challenge the learners

Immersive Simulation: Urinary Catheter

Avkin Antimicrobial Simulated Urine

"These products solve the problem that a lot of us have in simulation. When you practice on a piece of plastic, it's just not the same experience for the student."

Suzie Kardong-Edgren

Director RISE Center RMU
